

Preliminary MEBalancer for field balancing

Balance anything rotating.

The Instrument measures:

- Vibration vectors for balancing.
- Vibration.
- FFT for analysis.

Decide easily your machine balancing condition, compare to standard levels.

- Balancing to ISO-standard for rotating machinery in workshop or field.
- Tracking vector display, 10 Ah LiOn std battery, 30 Ah option.
- 8" touch windows PC, rugged as option, use any PC with BT, cable, netw. opt.
- Also used as upgrade for balancing machines, new hi sensitivity electronics.
- Calibration data can be saved for reuse on similar rotors.

Tested and Windows XP to Win 10.

Technical data

Accuracy

Vibration 2ch	< 2.5% or+- 0.5 mV RMS
Angle	<1% or +-1 DEG
Speed	<2% or +- 1RPM 1-12000RPM
Accel supply	4.1 mA @ 24V
Tacho supply	+ 12V or + 24V max 100mA

Specification may vary depending on upgrades. Spec. may change anytime.
